**1973**  
**"Patriots — Leaders"**

*Past Issues*

**No Longer Available**

**"SYMBOLS OF FREEDOM"** Complete and symbolic in itself, it also completes the series of **5** plates started in 1972.

We believe this series of **5** plates is the only series of its kind being produced in America, and significantly, is being produced from American clay, — yes, from Oklahoma soil. They are also being priced so reasonably that most Americans can afford to collect them and proudly own them.

They portray significant events relative to the American Revolution starting with the beginning of the revolution and continuing through that time in history until Independence was achieved. On the back of the plates are signatures of the signers of the Declaration of Independence. We believe the set of **5** will eventually be one of the great treasures of collectors throughout the United States. There are only **5** plates and the molds are destroyed every New Year's eve for the plates produced that year. They are 8½" in diameter: color, White Sand; foot drilled for hanging; all plates are copyrighted. They are sculptured in low Bas-relief. They are signed by the artist; Mr. Frank in 1972, 1973 and by his daughter Joniece Frank in 1974, '75 and '76.

**1974**  
**"Battles For Independence"**

**1975**  
**"Victories For Independence"**
