

PHOTO COURTESY OF SAPULPA HERALD

As the sun arose for most on September 26, 1983—it appeared to set for us . . .

PHOTO COURTESY OF TULSA TRIBUNE

However, because we believe, The Frankoma Family held together to look upward and forward and started to rebuild . . .

Now, the sun is shining on our new plant as we launch into our second Fifty Years.

FRANKOMA POTTERY

1984

Why Frankoma-?

THE FRANKOMA STORY

FRANKOMA POTTERY has rightfully earned its position as America's outstanding creators of "useful and beautiful" earthenware. The colors, textures and crafted designs are created at Frankoma, and are unique in American ceramics. Frankoma entered the field of ceramics in 1933, utilizing the heritage left it by its predecessors, the Southwest Indians. Our aim was to combine the traditional art of the Indians, the spirit of the American Pioneer and the creative tendencies of the youth of the Great Southwest, and mold them into good pottery forms.

John Frank, originator of "Frankoma," came to Oklahoma from Chicago in 1927. His teaching Art and Pottery at the University of Oklahoma and his work with the geological survey - unearthing the Oklahoma clay deposits - brought together valuable material for his future venture of "potting." In 1933 he started a "studio" pottery in Norman, Oklahoma, - equipped with one small kiln, a butter churn for mixing clay, a fruit jar for grinding glazes and a few other crude tools and tables. It was necessary to continue teaching until enough ware was produced to prove that a product could be made of Oklahoma clays that was a contribution to Art and Ceramics and still salable. Resigning his teaching in 1936 he and his wife, Grace Lee, working side by side, set out on a venture of creating beautiful pottery for every day living. They felt the need of using Oklahoma clays for Oklahoma's first pottery. First a clay from Ada was used, then in 1954 a red burning clay dug at Sapulpa became the basis for all Frankoma ware. In 1938 the "studio" grew into a small factory as it moved from Norman to Sapulpa, where it is now. (Original plant 5,500 square feet; through the years it has grown to the existing 79,000 square feet.)

Frankoma demanded of itself to make as fine a pottery as could be made considering the limitations of its materials. This means constant research to take advantage of raw materials and processes as they are brought to light.

Pottery enjoys so many advantages over the more "refined" and delicate ceramic wares. Frankoma Pottery is manufactured by its unique once-fired process - clay body and colored glaze are fused and fired at the maturing point of the clay, and tempered as it slowly cools. It can be used "indoors-outdoors" because of its ruggedness and durability. It can really "take" the handling of every day use. It can be used in a dishwasher. It is also ovenproof and food can be served in the same dish in which it is baked or prepared. It also keeps foods and drinks hot much longer. Color is such an indispensable part of today's decor, and Frankoma creates an exciting wide range of colors and textures. Our "Rutile Art Glazes" which have identified Frankoma's unique tableware around the world have successfully been produced only on our colored earthenware clay. The first to introduce colored din-

Grace Lee and The Late John Frank exemplify true American determination and the Free Enterprise System. They started with only a dream, and through hard work created one of America's most unique potteries recognized the world over. 1971 they were named, "National Small Businessman of the Year" and personally recognized by the President of the United States for their accomplishments.

Grace Lee and The Late John Frank (pictured January 1973)

nerware on the market in the 1940's was one of the basic reasons John Frank was presented the award "1972 Marketing Man of the Year."

Mr. Frank passed away November 10, 1973. Grace Lee, although semi-retired still contributes to Frankoma's designs and policies.

The Business continued after Mr. Franks death under the leadership of their daughter Joniece Frank and a trained, dedicated staff.

In 1979 Joniece was joined by her husband Duane Nelson. And now, Frankoma is once again being guided by a highly successful and creative husband and wife team, dedicated to perpetuating the tradition and ideals of those who pioneered the business half a century ago.

Duane and Joniece Frank-Nelson

For the first time in our history, we will reissue a collector vase. Due to popular request, V14 Vase is being issued lettered "Second Edition" on the bottom, and not numbered. The number will be V14-2.

For thousands of years men have gloried in creating "atmosphere" around their favorite sport—eating. Harmonious and beautiful surroundings not only add to the pleasure of eating but make it a healthier pastime. We still lavish all we possibly can on our banquets and feasts, for we love to eat.

Men have always managed to devise some sort of receptacle to hold food, either raw or prepared, and the quality and value of his utensils depend more on his love of beauty and ability to create than the size of his purse. Of the many materials used throughout the centuries, in all countries of the world — iron, copper, brass, stone, wood, silver, and even gold, ceramics has remained the favorite of all eating vessels. Since the acceptance of "whiteware" in the sixteenth century, most fine tables have been set with "dinner ware" or "china." This is sometimes a white earthenware, or a compounded china body, or even a

translucent true porcelain. Its quality depends on the selection and handling of the materials plus its Art value expressed in line, form and color.

Today, from the crudest earthenware to the finest porcelain, we still choose CERAMICS of some kind for our table. Although we would not eliminate "whitewares," we love our modern pottery tableware. Why not? It is gay, happy, and colorful, and surely fits into our modern mode of living. It is with this in mind that we have created FRANKOMA TABLEWARE.

For one design we have gone to the Great Plains of the Southwest and offer you the "PLAINSMAN" pattern. Its well chosen, simple lines and sturdy shapes create an atmosphere benefitting its heritage. It is most appropriate "for fun or fashion." Every piece can be used in the microwave, oven and dishwasher.

6TSFW - Flame & White 71.50

Set your table with these lovely color combinations: Black and White or Flame and White. They create new exciting table decor without being repetitious. The standard sets come with cup, bowl, sugar and creamer, serving bowl in black or flame (as depicted with asterisk*) and dinner plate, salad plate, saucer, platter in white. Use your own creative imagination when ordering other accessory pieces. Truly a new concept in eating fun. "Westwind," with its basic simple lines, permits freedom in expression of personality which is so important in smart contemporary homes. You'll LOVE "Westwind" - and, of course, it is all ovenproof and dishwasher proof.

SIMPLICITY in its truest form - that's "Westwind." The carefully broken line of the shallow coupe shape is the key to the pattern. The simple unbroken line of the cup handle, with its broad thumb rest, combines grace and security.

The large and small open bakers have rolled rims for safety and ease of handling. Cleaning is no task. Much care is exercised in making these "easy-grip" knobs on the lids. This oven-to-table pottery is truly the gourmet's delight.

The homemaker today appreciates the warm, cordial earthen colors in this unique pottery. Its waxy textures are so lovely to the touch. Such tableware should be selected for its artistic qualities as well as its serviceability. "Westwind," with its basic simple lines, permits freedom in expression of personality which is so important in smart contemporary homes. You'll LOVE "Westwind"-and, of course, it can be used in the microwave, oven and dishwasher.

Our American homes are being designed and built so that home makers can take advantage of the many modern conveniences yet develop their own personalities in color and styling.

The furnishings for these contemporary homes are practical and simplified. They must be selected carefully to preserve a cordial atmosphere, which we all wish for our family and friends.

Frankoma was sensitive to these trends when this new dinnerware was being designed. The atmosphere surrounding LAZYBONES is relaxing, for you are influenced by its free flowing sculptured lines. As you accept the invitation to handle and caress each piece, you will love

the way they fit the contour of your hands, for immediately they become a part of you.

Food cooked in Lazybones can go from the oven to the table—and there are so many uses for each piece. They are designed to serve!

Notice the array of Frankoma's colors. They are the gourmet's delight, for they all compliment your food and share in making every meal an occasion. The shapes themselves are both practical and beautiful.

When you set your table with Lazybones, you are set to relax, and enjoy your share of casual living. It will be the "Talk of the Table" with your family and friends.

1,000 YEARS before Columbus "discovered" America, there flourished a civilization in this country whose artistic, social, and religious standards far surpassed any European peoples up to that time. Many archeologists not only compare the art and architecture of the Mayans and Aztecs favorably with that of ancient Egypt, but in many respects prefer their achievements in art importance. THESE were the FIRST Americans.

It is well established that the nucleus of American Indian tribes spread from the Great Southwest region. Our particular interest is in those who went South—the Mayans and Aztecs. They have given to the world some of its richest art treasures. The "golden age" of Mayan Art, in which they developed their pantheon, built their temples, perfected their Arts, social structure and government, occupied the first few centuries after Christ.

The Great Temple in Copan, Yucatan, built to the War Diety, was completed just before the Spanish invasion. The temple compound covered almost a quarter square mile,

comprising seventy-eight buildings — a most stupendous achievement and a monument to architectural beauty.

The most widely known of the Mayan and Aztec arts are the numerous hieroglyphs. They were used profusely on buildings, altars, monuments, and other such places, not only for embellishments, but for the recording of information. The decorations on the stairway of Copan alone were composed of over 2,500 different glyphs. Freehand methods prevailed entirely, for their art was their only written language.

Pottery has always evidenced every strata of culture. Fragments of pottery have been found where all other records have been destroyed, even in prehistoric times. Throughout the long history of all Indian tribes, pottery has been the universal art. The pottery of the ancient Southwestern Indians challenges comparison in color, form, and mastery of line with that of the Greek and Orientals.

It is through the inspiration of this wealth of beauty that FRANKOMA has created its Mayan-Aztec tableware.

In 1965 The Late John Frank, Artist and Founder of Frankoma Pottery created the first annual Christmas plate made in America. They were inspired by the Christmas story and the fact that the life of Christ has been the inspiration of more "Art" in all of its mediums, than any one subject in the history of the world. A self imposed demand was that every plate should have a scriptural background for each years renderings. No other pottery to our knowledge has attempted such a religious annual commemorative plate in the history of America.

They are done in low bas-relief, with sharp enough detail, and sufficient good modeling as to make each plate a treasured piece of **sculpture**, as well as tell a story relative to Christmas time and the life of Christ. They are done in a semi-translucent "Della Robbia" white glaze. The plate is 8½ inches in diameter; the master mold was signed by Mr. Frank through 1973. Beginning in 1974 the master mold is signed by his daughter Joniece Frank; all plates are copyrighted. The production is limited to those that are actually sold up till about the 10th of December. The master mold is destroyed on Christmas eve, and there are none made after that. The edition is limited to that year.

These plates are introduced in early spring and only sold through Frankoma Pottery dealers, for it was created as a bonus for their participation and selling Frankoma Pottery. We have tried to keep the price very reasonable so that more people can afford to own them, collect and enjoy them.

We hope they will be a spiritual inspiration and reminder of the lasting value of the scriptures, and a blessing to all those who possess them.

REPRODUCTIONS OF WILLARD STONE'S WOOD CARVINGS

Today's homes are "confines around our treasures", no matter what they "cost". Only a few can afford the "originals" of masters, but even the meagerest of homes are entitled to be enriched by living with good reproductions of them. All of the originals of the items we reproduce, are owned by Frankoma.

The wood sculpture of **WILLARD STONE**, a Cherokee, is a part of most museums, especially of the Southwest. His unique down to earth and humanistic style has brought him into many of the leading art galleries in America. We try to faithfully reproduce the few we are privileged to own.

FROM

Frankoma Pottery

FRANKOMA - An Idea Takes Shape

Process of Manufacturing

Frankoma is hand crafted earthenware pottery. Frankoma is a complete pottery; we dig our own clay in Sapulpa, process it; develop and mix all our own glazes and colors; make our own molds and create our own designs.

Our pottery is formed in one of **two ways**; casting and pressing. Casting: (1) The clay is mixed with water to make a liquid clay called "slip", then poured into plaster molds. During the 45 minutes the slip sits in the mold, water is absorbed by the mold creating harder clay against the walls of the mold. The slip is then poured out, the clay the water was taken from remains, thus creating the piece. (2) After 4 more hours of drying and preparation the piece is removed from the mold to dry overnight. Pressing: (3) Because of the nature of the clay, some pieces cannot be made by casting. Therefore, we use a hydraulic press. The clay is placed between the two pieces of a mold. The top of the mold lowers up to 50 tons of pressure and forms the piece. All plates and flat pieces are made on the press.

Regardless if a piece is cast or pressed, it must be dried and then trimmed. (4) Each piece is hand trimmed. The rough edges are removed with a paring knife. (5) Then, to complete the smoothing process, the piece is wiped with a wet sponge. Frankoma is unique in that we fire our pottery only once; therefore, after the trimming, it is ready for the glaze, (glaze is the color; glaze is basically a liquid glass that melts and fuses with the clay when it is fired). The glaze is applied on the inside by "dipping". The glaze is simply poured in and then poured out, and it coats the inside. (6) Then the outside is glazed with a spray gun. The application of the glaze is very important. It must be applied just right, not too thin and not too thick. (7) The pottery is then fired for 18 hours at approximately 2,000 degrees. During the firing process the glaze melts, changes color, and becomes the piece of pottery you enjoy in your home. (8) All Frankoma's designs are original. This requires a complete well equipped mold shop with competent mold makers to effectively complete the designers ideas for production.

Because of the great demand and a desire to always maintain Frankoma as a leader in the ceramic field the plant has recently expanded to 79,000 square feet, employing 140 people who make up the Frankoma Family.

You are cordially invited to tour the plant during working hours.

COME SEE US . . .

There has been much said during the last few years about "lead poisoning" from using pottery dishes and containers. Shown here is the Official Seal of Certification, that this ware is ALL safe from lead poisoning.

- Practically all pottery wares made in the U.S. are so certified, so . . .

THE PHOENIX PLATE PH

The Phoenix was a fabled bird in both Greek and Egyptian mythology. Only one such bird existed at any one time. The Phoenix lived for 500 years. At the end of each life cycle, it layed itself on an altar to be consumed by fire; another Phoenix arose from the ashes with renewed youth and beauty. The long life of the Phoenix and its traumatic rebirth from its own ashes made it a symbol of immortality and spiritual rebirth.

There are few pictures of the Phoenix because each bird was different. During its life cycle, it would cast off mortal worries and problems, therefore, explaining why the new Phoenix rose from the ashes more youthful and beautiful than before, as he came closer and closer to God. It is said, that he who depicts its likeness expresses his conception of immortality as he sees it.

June 4th, 1983, was the official celebration of Frankoma Pottery's 50th Anniversary. Just 3 months and 22 days later, September 26, 1983, fire destroyed 90% of the building and contents. As we sat and stared blankly at the ashes of our lives, the owners and the Frankoma Family of Employees decided to rebuild. With this now complete, we hope we have, as the Phoenix, risen from the ashes with renewed vitality to create beautiful pottery for you to enjoy.

HOW TO MAINTAIN THE BEAUTY OF FRANKOMA:

Frankoma's hand-mixed glazes are designed not only for beauty, but also for durability. The following simple steps will insure that beauty and durability.

1. Frankoma's glazes are durable, but the alloys in some flat ware may occasionally mark the finish. If these marks should appear on your pottery, a mild powdered cleanser should be used to remove them. Normal mild household cleansers will not harm the finish.
2. Cups and mugs should be rinsed after serving coffee or tea to avoid stains. Should a stain buildup occur you could restore the beauty of your cups by soaking them in a solution of 1/2 liquid bleach and 1/2 water.

HOW AND WHERE YOU CAN PREPARE FOOD:

Frankoma is safe in conventional ovens, microwaves and dishwashers. However, it should never be used from cold temperatures into any heating unit. Frankoma should never be used directly on heat from either electric or gas ranges. Room temperature is best for placing of dinnerware in the oven. Hot serving pieces should never be placed on a cold or wet surface. For reasons unknown to us, Frankoma pieces will retain heat in a microwave and other similar pieces remain normal.

PROTECTING DELICATE SURFACES:

1. Due to Frankoma's unique red-firing clay it is necessary for each and every piece to have an unglazed surface on the bottom. Due to the nature of the product there may occasionally be an abrasive surface on the unglazed area. For this reason it is recommended to always use placemats or a tablecloth with any pottery, stone ware or china.
2. Pottery floral containers and planters require the same care as glass. Always place your container on a plate of some type. Condensation may occur on pottery as it does on glass, and a plate will protect your good wood finishes.

WARRANTY:

Frankoma Pottery carries a full three-year warranty against defects in materials or workmanship. Our warranty does not cover chipping. Frankoma Pottery is manufactured with as much durability as possible; however, chipping can occur if contact is made with another object. If you find you have a defective piece, contact your local representative or Frankoma Pottery, Customer Service Department, P.O. Box 789, Sapulpa, OK 74066.

You are a welcomed guest at the factory any time. Should you come during working hours, we will be glad to conduct you through the plant to see Frankoma made. (Tours Monday thru Friday, 8:30 a.m. — 2:30 p.m.)
