TERRA COTTA DINNERWARE

Terra Cotta is now offered in dinnerware. The inside is glazed with color and the rich red-firing clay of Terra Cotta shows outside.

The colors available in Terra Cotta Dinnerware and gourmet items are Navy Blue and Terra Cotta (NB/TC), White Sand and Terra Cotta (WH/TC), Prairie Green and Terra Cotta (GR/TC), and Mountain Haze and Terra Cotta (MH/TC) Teal and Terra Cotta (TE/TC)

CARE OF TERRA COTTA EARTHENWARE

Terra Cotta earthenware is a clay product that has been fired in temperatures that approach 2,000° F and it is not glazed. The firing process does not vitrify (become glass-like), therefore it has some porosity and will absorb some moisture.

Terra Cotta dinnerware can be placed through the normal dishwashing process. It should be allowed to dry so that the moisture may evaporate from the porous characteristics of the terra cotta. If food adheres to the terra cotta and normal dishwashing does not remove the food, a pyrolytic process will remove such. An oven with a self-cleaning cycle that reaches 800° or more (pyrolytic) will bake the food off of the terra cotta.

HOW TO MAINTAIN THE BEAUTY OF FRANKOMA:

Frankoma's hand-mixed glazes are designed not only for beauty, but also for durability. The following simple steps will insure that beauty and durability.

1. Frankoma's glazes are durable, but the alloys in some flat ware may occasionally mark the finish. If these marks should appear on your pottery, a mild powdered cleanser should be used to remove them. Normal mild household cleansers will not harm the finish.
2. Cups and mugs should be rinsed after serving coffee or tea to avoid stains. Should a stain buildup occur you could restore the beauty of your cups by soaking them in a solution of 1/2 liquid bleach and 1/2 water.

HOW AND WHERE YOU CAN PREPARE FOOD:

Frankoma is safe in conventional ovens, microwaves and dishwashers. However, it should never be used from cold temperatures into any heating unit. Frankoma should never be used directly on heat from either electric or gas ranges. Room temperature is best for placing of dinnerware in the oven. Hot serving pieces should never be placed on a cold or wet surface. For reasons unknown to us, Frankoma pieces will retain heat in a microwave and other similar pieces remain normal.

PROTECTING DELICATE SURFACES:

1. Due to Frankoma's unique red-firing clay it is necessary for each and every piece to have an unglazed surface on the bottom. Due to the nature of the product there may occasionally be an abrasive surface on the unglazed area. For this reason it is recommended to always use placemats or a tablecloth with any pottery, stone ware or china.
2. Pottery floral containers and planters require the same care as glass. Always place your container on a plate of some type. Condensation may occur on pottery as it does on glass, and a plate will protect your good wood finishes.

WARRANTY:

Frankoma Pottery carries a full one-year warranty against defects in materials or workmanship. Our warranty does not cover chipping. Frankoma Pottery is manufactured with as much durability as possible; however, chipping can occur if contact is made with another object. If you find you have a defective piece, contact your local representative or Frankoma Pottery, Customer Service Department, P.O. Box 789, Sapulpa, OK 74067.

You are a welcomed guest at the factory any time. Should you come during working hours, we will be glad to conduct you through the plant to see Frankoma made. (Tours Monday thru Friday, 9:00 a.m. - 3:00 p.m. Gift Shop hours - Monday thru Saturday 8:00 a.m. - 6:00 p.m. Sunday - 12:30 p.m. - 5:00 p.m.)
