

The PLAINSMAN Collection

Color is such an indispensable part of today's decor and nothing allows the wide range of colors and textures in ceramics as Frankoma's red-firing clay. Frankoma's rutile art glazes—Prairie Green and

Desert Gold—which have identified our unique tableware around the world, can only be produced on colored clays. By applying these glazes in various thicknesses according to pattern and design, the red body is revealed through the glaze yielding a beautiful mottled effect when fired.

Desert Gold
